Welcome to CAD Solutions. Our mission is to provide quality learning on Computer Aided Drafting/Design software such as AutoCad and Solid Works, therefore enabling your company and your employees to become more proficient and cost effective.

Our instructors are talented, knowledgeable, and have real world experience in the field they teach. Our training facility is set in a beautifully landscaped atmosphere. A certificate is issued on the completion of each course and all of our classes are guaranteed.

Enclosed you will find a brief description of the courses we offer, a map to our new training facility, and a registration form. I've also included a schedule which indicates the dates, times, and tuition for the courses we offer. All classes are held at 2478 West 6830 South.

The tuition includes all course material. Please register early or let us know in advance the class(s) you plan to attend so we can be prepared to accommodate your needs.

Contact our office if you have any questions regarding the registration process or our training. If you would like information regarding onsite training, group discounts, special offers or need a customized class please contact us.
